

WALES, DAVID

David Wales

David Wales (5 Years Older)

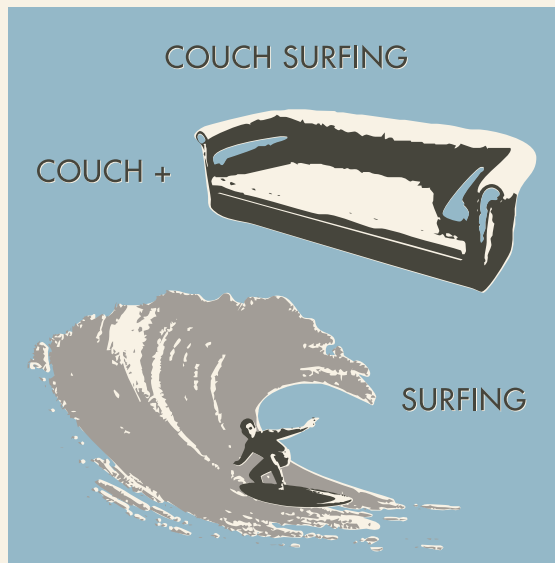

DAVID WALES Cambridge University Professor of Chemical Physics

HOMETOWN Bishop's Stortford, England

TSRC Since 1991. Past Board Member, Organizer & Participant. Pioneer organizer of the first-ever TSRC winter workshop in April 2007

“Instead of raising a hand to ask a question, it was compulsory to use a party blower to attract the speaker’s attention and to be wearing a party hat. This was probably my favourite TSRC session.”

I KNEW I WANTED TO BE A SCIENTIST WHEN I decided I wanted to be a chemist during my first year at secondary school when I was 11. The cause was an inspirational teacher.

A Popular form of Accommodation Poaching in Telluride

HIS STORY “Some of the meetings in the 1990s featured unconventional lodging arrangements. I was renting the house of a local resident with some of my students. We were surprised to find the property unlocked and vacant when we arrived, and enquiries revealed that keys to lock the front door did not exist. We were even more surprised a couple of days later when we woke up to find an unexpected visitor asleep on the couch. However, he explained that he knew the owners, and would often appear on their couch without prior arrangement, so all was well.”

FAVORITE HIKE Wasatch or Sneffels Highline
